

OFF THE TRAILS!

PARTNERSHIP PLAN

Québec Engineering Competition

The 41st edition of the QEC will take place from January 15 to 18, 2026, at the Université du Québec à Trois-Rivières, Drummondville campus. This event brings together 13 delegations from 11 different universities across Quebec, allowing hundreds of engineering students to participate. The QEC is overseen by the Quebec Confederation for Engineering Student Outreach (QCESO). It provides engineering students with the opportunity to showcase their talents through comprehensive engineering challenges.

Monday, January 20th, 2025

Subject: support letter for the Quebec Engineering Competition 2026

Dear Mr./Ms.

The Engineering School of the University of Quebec at Trois-Rivières (Université du Québec à Trois-Rivières) is pleased to support the organization of the 41st edition of the Quebec Engineering Competition (QEC), to be held from January 15 to 18, 2026 at the Drummondville Campus.

This annual event brings together students and industry professionals passionate about engineering, and showcases the creativity, innovation and collaborative spirit of engineers.

This competition provides a unique platform for participants to engage with complex problems, exchange ideas and acquire valuable experience for their future professional careers. The chosen theme for 2026, "Thinking outside the box", perfectly reflects our commitment to encouraging future engineers to think differently and find innovative solutions to the technical challenges they will face.

As we prepare for QEC 2026, our students are looking to build strong partnerships with companies and institutions that share our vision of innovation and excellence in engineering.

The support of our partners and sponsors contributes directly to the success of this event and to the training of the next generation of engineers.

We would like to count on your support in making the CQI 2026 a resounding success.

Yours sincerely,

Mr. Kodjo Agbossou,
Head of the Engineering School at the University of Quebec at Trois-Rivieres.

The theme « off the trails" perfectly reflects the spirit of the campus. Due to its small size, it sometimes faces complex challenges. Moreover, the forest surrounding the campus creates the illusion of moving beyond traditional paths.

The theme for QEC 2026:

Off the trails

THE DELEGATIONS PRESENT

13 campuses across Quebec send a delegation composed of members of their engineering student community. These members are all at different stages and enrolled in various engineering programs.

STUDY PROGRAMS

Mechanical Engineering
Electrical Engineering
Industrial Engineering
Civil Engineering
Software Engineering
Computer Engineering
Aerospace Engineering
Chemical Engineering
Physics Engineering
Geological Engineering
And many more!

THE DELEGATIONS

Concordia	
ÉTS	UQAC
McGill	UQAR
McGill-McDonald	UQAT
Polytechnique	UQO
Université Laval	UQTR
Université de Sherbrooke	UQTR-Drummondville

THE CHALLENGES

SENIOR CHALLENGE

Open to the public:

Technical trials only

The senior challenge brings together teams of four students who have between eight and twelve hours to develop a robotic solution with programming to address a problem revealed on the day of the competition. After completing the challenge, each team must present their work to a panel of judges and then conduct trials in front of an audience.

JUNIOR CHALLENGE

Open to the public:

Technical trials only

The junior challenge brings together teams of four students to develop a robotic solution without programming within four to eight hours. Participation is limited to students who have accumulated fewer than 60 credits in their bachelor's degree.

Lucaël Normandeau, Xavier Lavoie, 2025, Source : Polyphoto

ORATORY DEBATES

Open to the public: Yes

The oratory debates challenge highlights participants' skills in argumentation and persuasion within the field of engineering communication. Using eloquence and critical thinking, participants must defend a position on a given topic. The debates are held in a two-against-two format.

Alexandre Warin, Justine Major, Gabriel Comby, 2025, Source : Voltaic

ENGINEERING CONSULTING

Open to the public: No

Engineering Consulting is a challenge that stimulates participants' creativity in solving multidisciplinary problems within a limited time. The solutions are presented to the judges, who evaluate both the relevance of the ideas and the ability to defend them. Participants take on the role of project managers and must manage all aspects of a project effectively.

SCIENTIFIC COMMUNICATION

Open to the public: Yes

The scientific communication challenge involves teams of one or two students demonstrating their ability to explain engineering topics in a clear and accessible way to a panel of judges.

Floranne Lague, Keven Simard, Étienne Larouche, 2025, Source : Voltaic

INNOVATIVE CONCEPTION

Open to the public: Kiosks only

The innovative conception challenge brings together up to six students per team to showcase their entrepreneurial skills by designing an innovative product, service, or process. The creations will be available to everyone through kiosks and will then be evaluated by a panel of judges

REENGINEERING

Open to the public: No

The reengineering challenge tests teams' ability to improve and optimize existing products under new constraints. The solutions for teams of two are presented to a panel of judges, allowing participants to showcase their technical skills, creativity, and oratory talents.

PROGRAMMING

Open to the public: Technical trials only

The programming challenge tests multiple teams through various problems that require skills in computer and software engineering, such as algorithms, problem-solving, software architecture, and artificial intelligence. The solution is evaluated based on its functionality and originality.

PRESENTATION OF RESEARCH - GRADUATE CYCLES

Open to the public: Yes

This challenge allows participants to present their graduate-level research project. It consists of three components: writing a short summary article, giving a presentation in front of an audience, and undergoing an evaluation by judges in a closed session.

PUZZLE HERO

Open to the public: No

The Puzzle Hero is a challenge featuring a series of diverse tasks across various domains. It allows all students to participate in the background throughout the weekend. This challenge presents a series of puzzles, with points awarded based on the difficulty of each one.

Diversity and Involvement

The delegations are made of individuals who push their intellectual limits by applying the knowledge they have acquired throughout their engineering studies. They come from different engineering fields and are at various stages in their academic journeys.

Distinction within Universities

To participate in the QEC, delegation members must earn their place on the team. They must stand out in a selection competition within their university. Members who qualify for the competition have demonstrated their technical and theoretical skills.

Adaptability

The challenges presented to the teams are complex and require strong time and stress management skills. Teams have only a few hours to present their solution, often with constraints in terms of materials or concepts.

THE BENEFITS OF BEING A PARTNER : VISIBILITY

CREATING A NETWORK OF CONTACTS

The QEC offers a networking evening that allows visibility for partner companies. Competition participants, being highly active in their respective delegations, can promote your company within their network of contacts.

MEETING STUDENTS IN A DESIRABLE ENVIRONMENT

The competition allows you to observe delegation members performing in their environment, showcasing their technical skills.

STRENGTHENING THE COMPANY'S VALUES

The competition, with the networking evening being the perfect moment to promote your company's values, offers visibility and the opportunity to search for potential candidates.

THE BENEFITS OF BEING A PARTNER : JUDGE

PRESENCE THROUGHOUT THE WEEKEND

Judges are present throughout the competition weekend. From Friday onward, benefits of being a jury member at the QEC include food, accommodation, visibility, and access to all evening events.

A FULL WEEKEND WITH ENGINEERING STUDENTS

Judges will be present for the entire duration of the competition, allowing them to follow students throughout the weekend and observe them in their areas of expertise. This gives judges the opportunity to form connections with delegation members and discover them from a different perspective.

RESPONSIBILITY AND RECOGNITION

Being selected as a judge reflects your expertise and credibility in the competition's field. It can offer both professional and personal recognition.
